

## WAREHOUSING

Warehousing is the act of storing goods produced or bought in a place until they are needed. In other words, a warehouse is a place where goods are stored until they are needed by the consumers.

### Factors to be considered in siting a warehouse

1. Location of the factory, that is proximity of the warehouse to the production ground.
2. Nearness to the market.
3. Nearness to the distribution centres.
4. Operating costs if the warehouse
5. Cost of building the warehouse.
